

Expert Witness Services

The vast majority of maritime operations are conducted and implemented safely without issue. Accidents and incidents are rare but on those infrequent occasions an expert witness makes a vital contribution to quick and effective dispute resolution.

The NLA International team includes accomplished maritime operators, ships' captains, navigators, hydrographers, fisheries and maritime domain awareness experts.

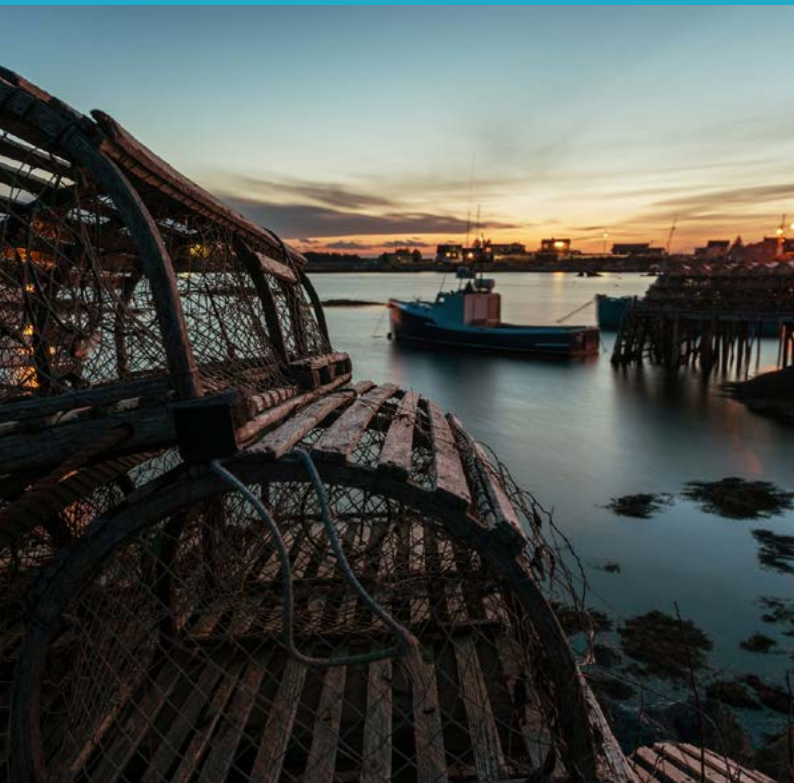

We provide expert analysis, opinion and legal reports for both arbitration and court proceedings and maintain the highest level of unbiased professionalism with an absolute focus on the expert witness's duty to the court.

All our experts undergo expert witness training, to ensure they fulfil their roles and responsibilities in obtaining instructions, assembling evidence, writing reports, conducting expert witness meetings and giving evidence at hearings or in court. In addition, they maintain current industry knowledge whilst drawing on vast and wide ranging practical maritime experience.

Expert witnesses are required because of their expertise and experience within a particular field, witness provision can be provided for the following disciplines:

- Hydrography
- Maritime survey
- Navigation
- Maritime operations
- Fisheries

To find out more about how we support ship operators, maritime companies and insurance clients in legal cases through the provision of trusted expert witness services please contact us at BEwitness@nlai.blue
